EDUCATION

- **University of Toronto** — Toronto, ON
  Coding Boot Camp Certificate — *Graduated 2022*
- **York University** — Toronto, ON
  Bachelors of Arts in Information Technology (with Honours) — *Graduated 2021*
  - **Relevant courses**: System Analysis and Design, Database Management Systems, Network Architecture

PROJECTS

- **Portfolio Website** — http://jeffiftyone.github.io/React_Portfolio/
  Repository: https://github.com/Jeffiftyone/React_Portfolio
  - **React Router**: Implemented React Router to manage client-side routing, enabling seamless navigation and enhancing the user experience by providing dynamic content rendering.
  - **React Components**: Developed a reusable React component for displaying projects, improving code maintainability and reusability.
  - **React Hooks**: Utilized React Hooks (such as useState and useEffect) to manage component state and side effects efficiently, resulting in improved code readability.
  - **Built using**: JavaScipt/ReactJS/CSS
- **Fitness Tracker** — https://jeffiftyone-fitnesstracker.herokuapp.com/
  Repository: https://github.com/Jeffiftyone/Fitness_Tracker
  - **Track User Progress**: Tracks the user's workout progress by displaying day-to-day user's workout results on graphs for visual representation
  - **Remote Database**: Implemented a remote Database for data security, running JawsDB as a Database as a service for 99.9% uptime.
  - **Application Deployment**: Successfully deployed application online using Heroku for real-time feedback and ease of use.
  - **Built using**: MongoDB/JavaScript/Bootstrap
- **Teach Thru Talk (Group)**
  Repository: https://github.com/FilipAlH/TeachThruTalk
  - **REST API**: Created routes and REST API to make collaboration between front-end and back-end easily communicated, improving application scalability.
  - **Database Administration**: Developed SQL queries to efficiently retrieve data from databases, utilizing Sequelize ORM for seamless integration and improved data access.
  - **Translator API**: Implemented feature that uses DeepL API to translate highlighted text to selected language, receiving positive user feedback and increased user session time.
  - **Built using**: MongoDB/Express.js/Node.js/Bootstrap

WORK EXPERIENCE

- **Poke Guys (Restaurant)** — Markham, ON
  Supervisor — *Apr 2018 - Oct 2020, Mar 2022 - Current*
  - **Interpersonal skills**: Resolves conflict and issues presented by customers by actively listening and problem solving, coming to a resolution that leaves the customer satisfied, increasing customer retention.
  - **Leadership**: Displays leadership and time management by delegating tasks to colleagues and ensuring tasks are completed, are actively involved, and all team members are playing to their strengths.
  - **Communication**: Communicated progress and roadblocks to executive management and made recommendations for problem solving solutions that would eventually be put to market, increasing productivity and efficiency.

SKILLS

- **Languages**: Java, HTML, CSS, Javascript, Dart, SQL
- **Frameworks**: ExpressJS, React, Bootstrap, Flutter, MongoDB
- **Other**: Git, NodeJS, Postman, Firebase
